

Small teams don't fail because of size. They fail because of structure.

This book explores how high-performing teams design systems that scale clarity, decision-making, and execution—without adding complexity.

In an AI-native world, leverage doesn't come from more effort. It comes from better systems.

IN THIS BOOK, YOU'LL LEARN HOW TO:

- Build systems, not dependencies
- Design for leverage, not scale alone
- Align people, tools, and decisions
- Operate effectively in AI-native environments
