

What if growth no longer required headcount?

In an AI-amplified world, execution is abundant.
The real bottleneck is judgment, structure, and decision integrity.

Small Teams, Strong Systems presents a practical operating model for building complex products with fewer people and more leverage.

Inside, you will find:

- A 6-person operating model for high-leverage execution
- Structural patterns that prevent bloat and burnout
- Decision systems for uncertainty and frontier complexity
- Practical examples from technology, product, and research teams

SMALL TEAMS STRONG SYSTEMS

Designing High-Leverage Work in the AI Era

A practical guide for founders, builders, researchers,
and managers designing high-leverage teams.

Execution is abundant. Judgment is the bottleneck.
